

Improving your book's visibility on Amazon.co.uk and Amazon.com

Ashgate is a member of the Amazon Advantage programme which means that both Amazon.co.uk and Amazon.com hold stock of Ashgate, Gower and Lund Humphries titles making them available for immediate delivery.

There are various ways that you can increase the visibility of your book on Amazon; the most obvious of these being to encourage anyone who has read your book to submit a review on the Amazon system. It is also possible to post quotes from reviews in journals and newspapers to the site. Reviews contribute to making the entry for your book more helpful and useful for customers.

You can also create Listmania listings for any topic on Amazon. Customers use lists like these to find relevant books. You can create a listmania list featuring your own book.

You can create your own author page on Amazon with the option to add your own photo, include a biography, edit your bibliography and add any missing book covers. You can also include a discussion board. Visit Amazon Author Central to get started. <https://authorcentral.amazon.co.uk/gp/landing>.

The Amazon affiliate programme allows you to earn commission (usually around 5%) on sales of books that you generate from your own site. Setting up an Amazon shop on your own site is a very simple and speedy process. The system is sophisticated enough to allow you to create your own mini bookshop, which can have several pages listed by subject. Aside from promoting your own book, you may like to use the system to offer your own recommendations of core books in your subject area. The choice of books is entirely up to you and the application allows you to add a short note explaining your selection or to add a commentary to each book you select to display. You can therefore just choose to use the Amazon shop as a vehicle to sell your own book or create a more comprehensive list of wider reading for your students.

A number of social networking sites include optional Amazon applications. **LinkedIn** enables you to add a window to your profile within which you can showcase your book or one that you've read and wish to recommend to others.

If you would like help with any of these ideas, you can use the Help function on the Amazon site and of course, please don't hesitate to contact [Elaine Hill](#).
